Message from President

Over the past five years, the Charvi Empowerment Society has made remarkable strides in advancing its mission to enhance the livelihoods of rural communities. This achievement stems from our commitment to ensuring that participants are not merely recipients of interventions but proactive contributors of change. By fostering a sense of ownership and collaboration, we have empowered individuals to take meaningful steps towards transforming their lives and communities, engaging deeply with our programs and initiatives throughout their journey.

The dynamic nature of participants' lives, the inherently adaptive approach of development work, and the aim to establish sustainable systems have been thoughtfully integrated into our program, ensuring flexibility to accommodate diverse needs and contexts. This variability has inspired us to evaluate positive outcomes beyond standard program deliverables, highlighting how livelihoods extend their impact far beyond mere income generation. The ripple effects on rural lives are multifaceted—encompassing health, education, agriculture, environmental stewardship, and regional development. By creating opportunities for rural communities to stabilize household incomes, we have initiated a chain reaction of progress. What began as a modest step forward has proven to be a pivotal element in a transformative, long-term journey toward resilience and empowerment.

At CES, we hold immense gratitude for the stars who illuminate our path—our dedicated staff, who have sacrificed their own welfare to safeguard and uplift our community. Their unwavering commitment has been a beacon of hope during challenging times. We also celebrate the tireless efforts of our supportive volunteers and team members, whose resilience and dedication have ensured that we remain steadfast in our vision. To every advocate and champion of our mission, your belief in our purpose has been instrumental in driving the progress we see today. A cornerstone of our accomplishments lies in the convergence and collaboration of diverse entities—individuals, institutions, local government bodies, and businesses. We deeply appreciate their collective efforts in fostering sustainable change at the grassroots. At CES, we believe collaboration is a multiplier—of efforts, of impact, and of results. It is this synergy that propels us forward, turning possibilities into reality.

As we look to the future, we acknowledge that the road ahead may bring uncertainties. Yet, even in moments of darkness, we find guidance and inspiration in the stars above—those who shine brightly with purpose and determination. Together, we will continue to chart a path toward transformative change.

About Organisation

Charvi Empowerment Society (CES), established in 2019, is a dynamic and innovative non-governmental organization (NGO) dedicated to fostering sustainable development and improving the quality of life in India. With a mission to create meaningful, long-lasting changes, CES collaborates closely with communities and professionals to address critical social, economic, and environmental challenges.

The organization operates across diverse sectors, including health, education, agriculture, youth development, and environment sustainability. CES also focuses on enhancing incomes through livelihood programs tailored to empower marginalized communities.

Since its inception, CES has made a significant impact by implementing initiatives that address critical issues such as:

- Education: Promoting access to quality education and skill development.
- Skill Training: Providing vocational training to enhance employability.
- Agriculture Sustainability: Supporting farmers with innovative practices to boost productivity and ensure sustainable farming.
- Women Empowerment: Enabling women to become self-reliant through entrepreneurship and leadership training.
- Entrepreneurship Development: Encouraging innovation and self-employment among youth and adults.
- Livelihood Programs: Creating income-generating opportunities to improve economic stability.
- Watershed Management: Ensuring sustainable water resource management.
- Financial Literacy: Empowering individuals with knowledge to manage personal and community finances effectively.
- COVID-19 Response: Providing critical support during the pandemic through relief and recovery programs.

CES's commitment to community engagement and professional collaboration has resulted in a wide-reaching impact, transforming lives and fostering resilience among vulnerable populations. Guided by a vision of empowerment and sustainability, CES continues to innovate and expand its efforts to build a better future for communities across India.

Meet Our Leaders

Rohini Singh
PRESIDENT

Rohini Singh is a seasoned professional with a dual Masters' degree in Business Management and Social Work, bringing over 14 years of extensive experience in Livelihood Development, Monitoring & Evaluation (M&E), Research, Training, and Project Implementation.

Her expertise lies in designing and managing impactful programs that foster sustainable livelihoods, conducting in-depth evaluations to measure program outcomes, and delivering high-quality training modules tailored to diverse stakeholders. With a strong background in research and data analysis, she has contributed to evidence-based decision-making and the development of innovative project strategies.

Rohini's career has been dedicated to driving meaningful social change through meticulous planning and execution of projects aimed at empowering communities and promoting socio-economic development. Her collaborative approach and commitment to excellence make her a valuable asset to any organization working in the development sector.

Asha Rani
TREASURER

With over 19 years of enriched experience in the Social Development Sector, Ms. Asha is a highly committed and passionate professional with a strong academic foundation in Social Work. Her career is marked by impactful contributions in the areas of health and skill development, showcasing her dedication to driving positive social change.

In the health domain, Ms. Asha has demonstrated expertise in addressing critical issues such as HIV/AIDS, adolescent sexual and reproductive health, and family planning. Complementing her health sector achievements is her extensive work in healthcare & skill development initiatives.

Throughout her journey, She has exemplified a results-driven approach, coupled with strong interpersonal skills and a deep commitment to uplifting underserved populations. Her ability to engage stakeholders, foster partnerships, and drive program efficiency makes her a valuable asset to any organization in the social development landscape.

Prashant Singh
SECRETARY

With 15 years of extensive experience in the Social Development Sector, Mr. Prashant has developed specialized expertise across key areas of below-the-line initiatives. His proficiency spans Skill Training, Livelihood Development, Watershed Management, and Strategic Planning in the Corporate Social Responsibility (CSR) domain. He is adept in diverse focus areas, including Road Safety, Health, Education, Project Planning & Implementation, Communication Strategies, and Financial Management.

Known for his result-oriented approach, He combines strategic vision with operational excellence to deliver impactful social development programs. His ability to design and implement sustainable initiatives aligns with organizational goals and community needs, creating measurable outcomes and long-term benefits.

Vision & Mission

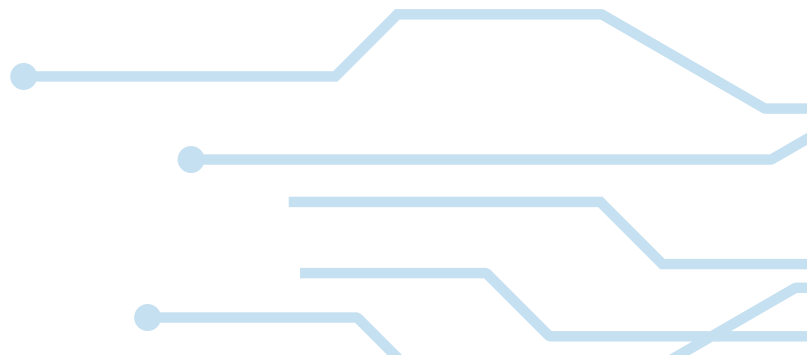

VISION

Our vision is to create a better Society which provides basic Health, Education, Livelihood and empowerment to every citizen.

MISSION

Empowering the autonomy of the society consolidating its role in the Livelihood, Farming, Community Development, Education & Skill Development, sustainability, Health, Better Environment, and Income Generation.

Core Values

Serve people in need and work to address social problems.

Setting goals, standards and being accountable to them.

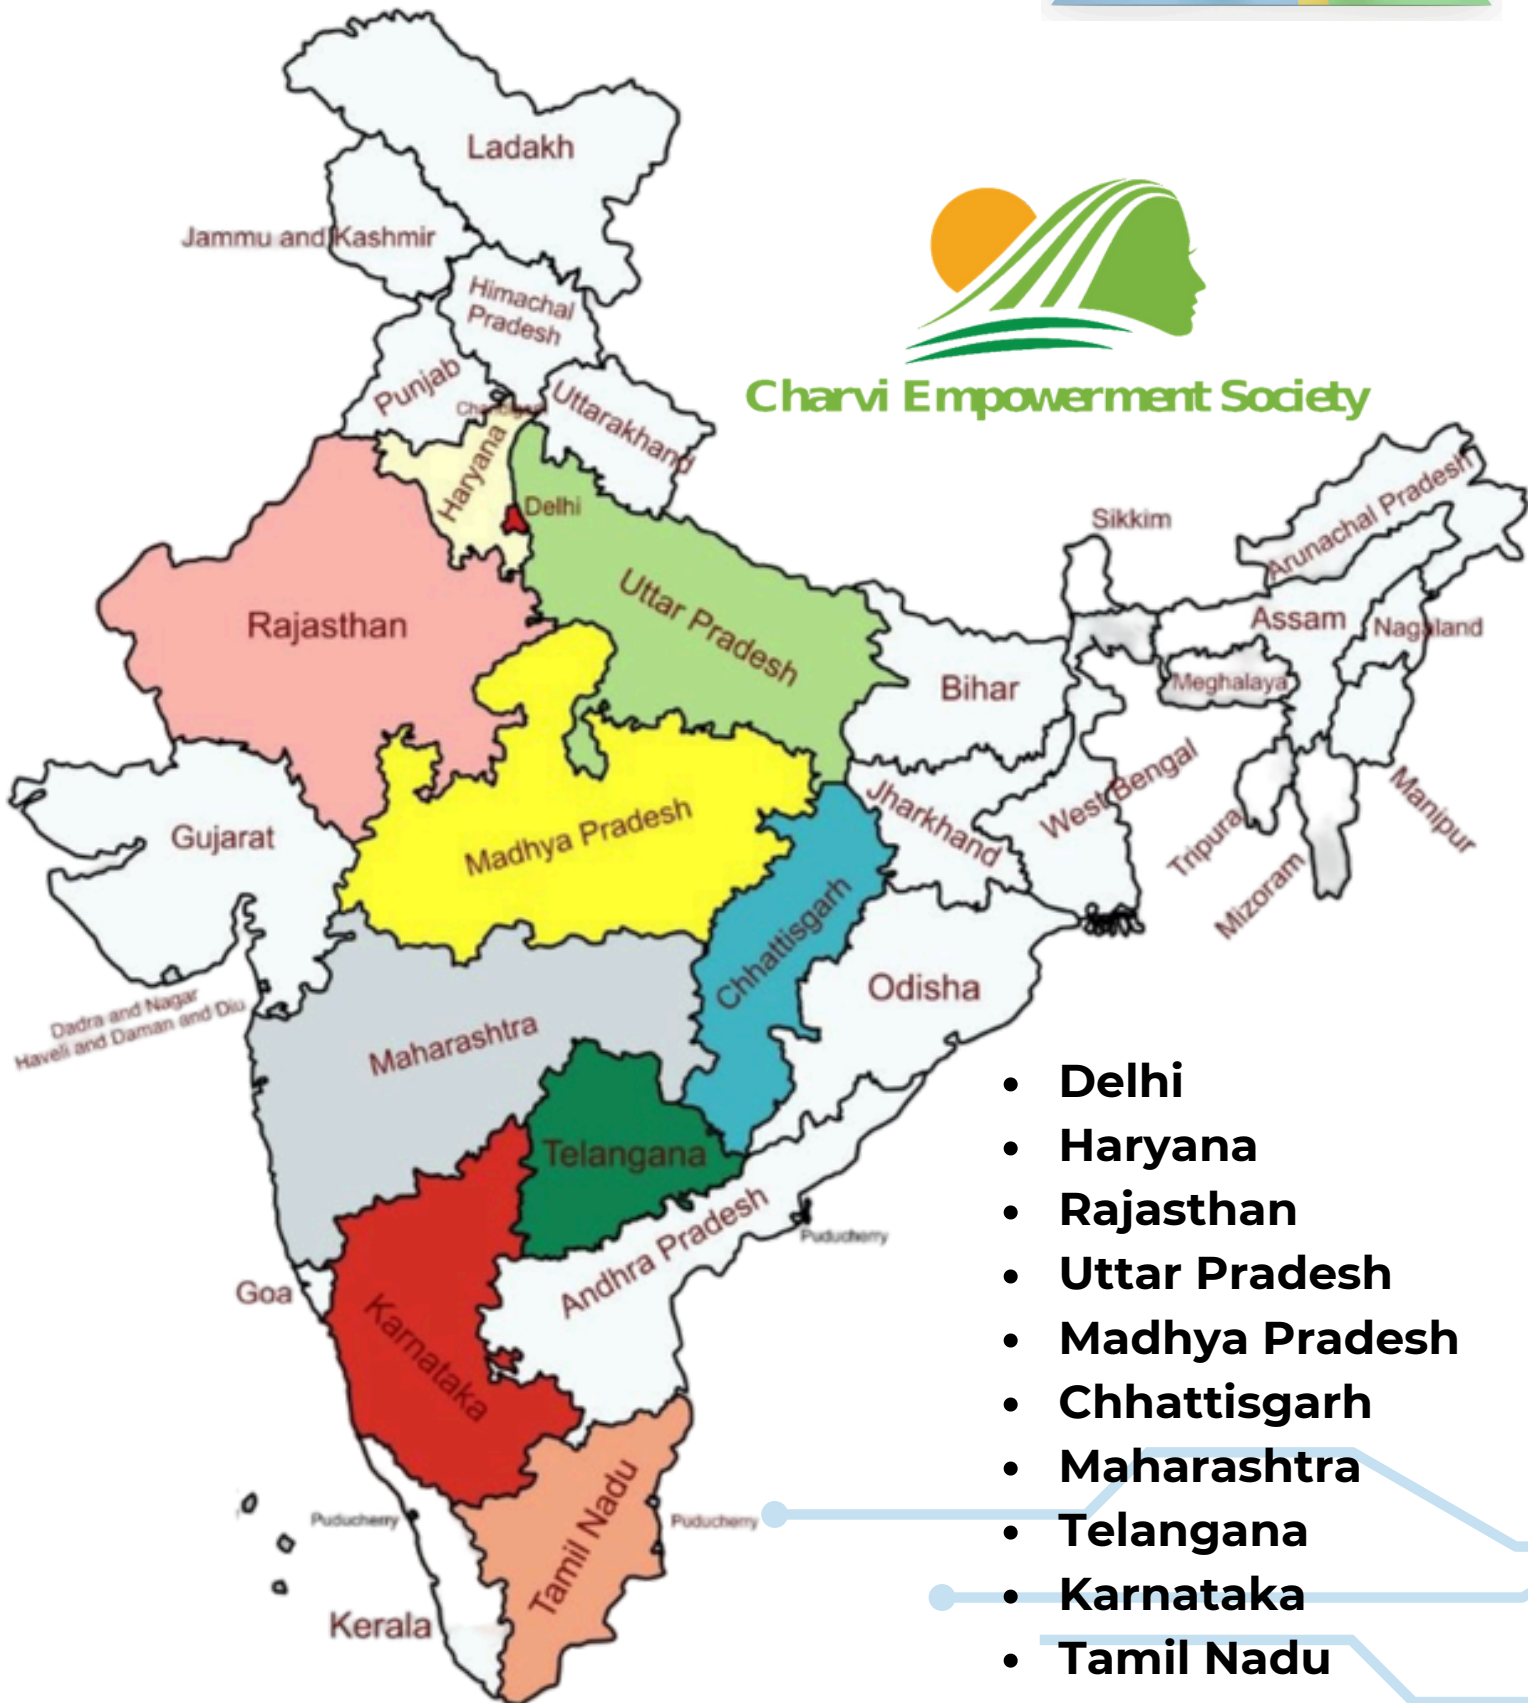

Be trustworthy and uphold the mission, values, ethical principles and ethical standards of the profession.

Fulfilling our duties and social obligation.

Agriculture Sustainability

Charvi Empowerment Society's Agriculture Sustainability Program aims to empower rural communities, particularly women, by promoting sustainable farming practices. This program has successfully trained over 200 female farmers in Telangana in innovative agricultural techniques such as medicinal mushroom farming, organic farming, beekeeping, and vermicomposting. These training modules not only improve agricultural productivity but also support environmental sustainability by encouraging eco-friendly practices that protect soil health and promote biodiversity. By equipping female farmers with modern farming techniques, the program enables them to increase their income and contribute to food security in their communities. In addition to providing hands-on training, the program organizes exposure visits to successful farming models, allowing farmers to learn from best practices and adapt them to their local context. This practical approach to learning enhances the impact of the program, empowering farmers with the skills and knowledge necessary to thrive in a changing agricultural landscape. The Agriculture Sustainability Program helps strengthen rural livelihoods, increase self-reliance, and create a more sustainable, resilient farming community. Through these efforts, Charvi Empowerment Society is contributing to the economic and social upliftment of rural women and the promotion of environmentally conscious farming practices.

Metal Craft Training Program

Charvi Empowerment Society, in collaboration with SIDBI Delhi, is spearheading an impactful Entrepreneurship Development Program aimed at empowering women through skill enhancement and economic opportunities. This program is designed to equip women with marketable skills in stitching, handicrafts, and metal craft, enabling them to establish sustainable livelihoods and contribute to their families' financial well-being.

In Delhi, women receive extensive training in stitching and handicrafts, learning techniques that combine traditional artistry with contemporary market demands. In Rajasthan, the program focuses on metal craft, teaching participants to create intricate, high-quality products that reflect India's rich cultural heritage. Beyond skill training, Charvi Empowerment Society assists beneficiaries in registering on the Udyam Assist Portal, facilitating their official Udyam registration. This registration not only formalizes their businesses but also opens doors to government schemes and financial incentives.

Mobile Health Unit

The Mobile Health Unit Project by Charvi Empowerment Society is a groundbreaking initiative that aims to bridge the healthcare gap in underserved rural areas of Tamil Nadu. This project brings essential healthcare services directly to the doorsteps of those in need, ensuring access to medical care for even the most remote communities. Daily health camps are organized as part of this initiative, offering free doctor consultations, distribution of essential medicines, and personalized counseling sessions. Additionally, the camps include health awareness programs focusing on preventive care, hygiene practices, and the importance of regular medical check-ups. The project addresses not only immediate healthcare needs but also builds a culture of health awareness, encouraging communities to prioritize their well-being. By reducing the burden of untreated illnesses and improving overall health outcomes, the Mobile Health Unit Project contributes to the sustainable development of rural areas. It reflects Charvi Empowerment Society's commitment to creating a healthier society where access to quality healthcare is a right, not a privilege. Through this initiative, we empower individuals with the knowledge and resources needed to lead healthier lives, fostering a ripple effect of well-being across entire communities.

Skill Development

Charvi Empowerment Society is dedicated to empowering individuals, especially women, through innovative skill development programs that drive economic independence and foster leadership. Our Entrepreneurship Development Program is designed to provide women with the tools, knowledge, and confidence required to establish and manage their businesses successfully. This program helps women overcome barriers to financial stability, enabling them to become self-reliant and contribute significantly to their households and communities. Additionally, our Metal Craft Training Program combines traditional craftsmanship with contemporary design techniques, empowering women to create high-quality, market-ready handcrafted products. By preserving cultural heritage and tapping into lucrative markets, this initiative not only provides a sustainable source of income but also strengthens community pride. Both programs emphasize self-reliance, encouraging participants to take control of their economic futures while contributing to local and national economic growth. These efforts are supported by workshops, mentoring, and access to networks that facilitate ongoing personal and professional development. At Charvi Empowerment Society, we believe skill development is a critical pathway to empowerment, fostering a sense of ownership and confidence that allows individuals to thrive as agents of change within their communities.

Solar Street Light Project

The Solar Street Light Project by Charvi Empowerment Society is a transformative initiative aimed at improving the quality of life in rural Tamil Nadu by enhancing safety, security, and sustainability. In response to the lack of adequate public lighting in remote villages, we have installed 50 solar-powered street lights in each of five villages, providing essential illumination to roads and pathways. This initiative significantly enhances the safety of rural communities, particularly benefiting women and children who often face mobility challenges after dark. By using solar energy, this project also promotes environmental sustainability, reducing reliance on traditional power sources and contributing to a greener, more sustainable future. The solar lights have made a noticeable impact by encouraging economic activity, as they enable residents to engage in evening markets, trade, and other community activities. Moreover, the project fosters a sense of security among residents, allowing them to navigate their environment safely during the nighttime. This initiative aligns with Charvi Empowerment Society's broader mission to empower rural communities through sustainable and renewable energy solutions. It enhances public infrastructure, promotes social well-being, and supports the community's transition to eco-friendly, renewable resources, contributing to a brighter future for these villages.

STEM Lab Education

Charvi Empowerment Society's STEM Labs are designed to revolutionize education in government schools across Haryana and Mumbai, with a particular focus on underprivileged communities. These labs provide students with a hands-on, practical learning experience in Science, Technology, Engineering, and Mathematics (STEM), equipping them with essential skills for future careers in these fields. The labs are fully equipped with modern tools and resources, allowing students to explore and experiment with various concepts and technologies that are often unavailable in traditional classrooms. By bridging the gap between theoretical knowledge and real-world applications, the STEM Labs foster critical thinking, problem-solving, and creativity, preparing students for success in a competitive world. Additionally, Charvi Empowerment Society provides teacher training to ensure that these resources are utilized effectively, encouraging the use of innovative teaching methods. The STEM Labs aim to inspire curiosity, cultivate talent, and provide students with the confidence to pursue higher education and careers in STEM fields. By empowering students, especially those from underserved backgrounds, Charvi Empowerment Society is helping to develop the next generation of thinkers, innovators, and leaders, ensuring a brighter future for these communities.

Plantation Project

Charvi Empowerment Society is dedicated to fostering environmental sustainability and enhancing community well-being through our Plantation Program. This initiative focuses on addressing the pressing challenges of deforestation, climate change, and environmental degradation by actively engaging communities in tree plantation drives. Conducted in various regions, including rural and urban areas, the program aims to restore green cover, improve air quality, and promote biodiversity.

Through the Plantation Program, we have successfully planted thousands of trees, including native and fruit-bearing species, to maximize ecological and economic benefits. These plantations not only provide shade, reduce soil erosion, and enhance groundwater recharge but also contribute to creating a healthier environment for current and future generations. Community involvement is a cornerstone of this program, as we collaborate with local residents, schools, and volunteers to raise awareness about the importance of trees and sustainable practices.

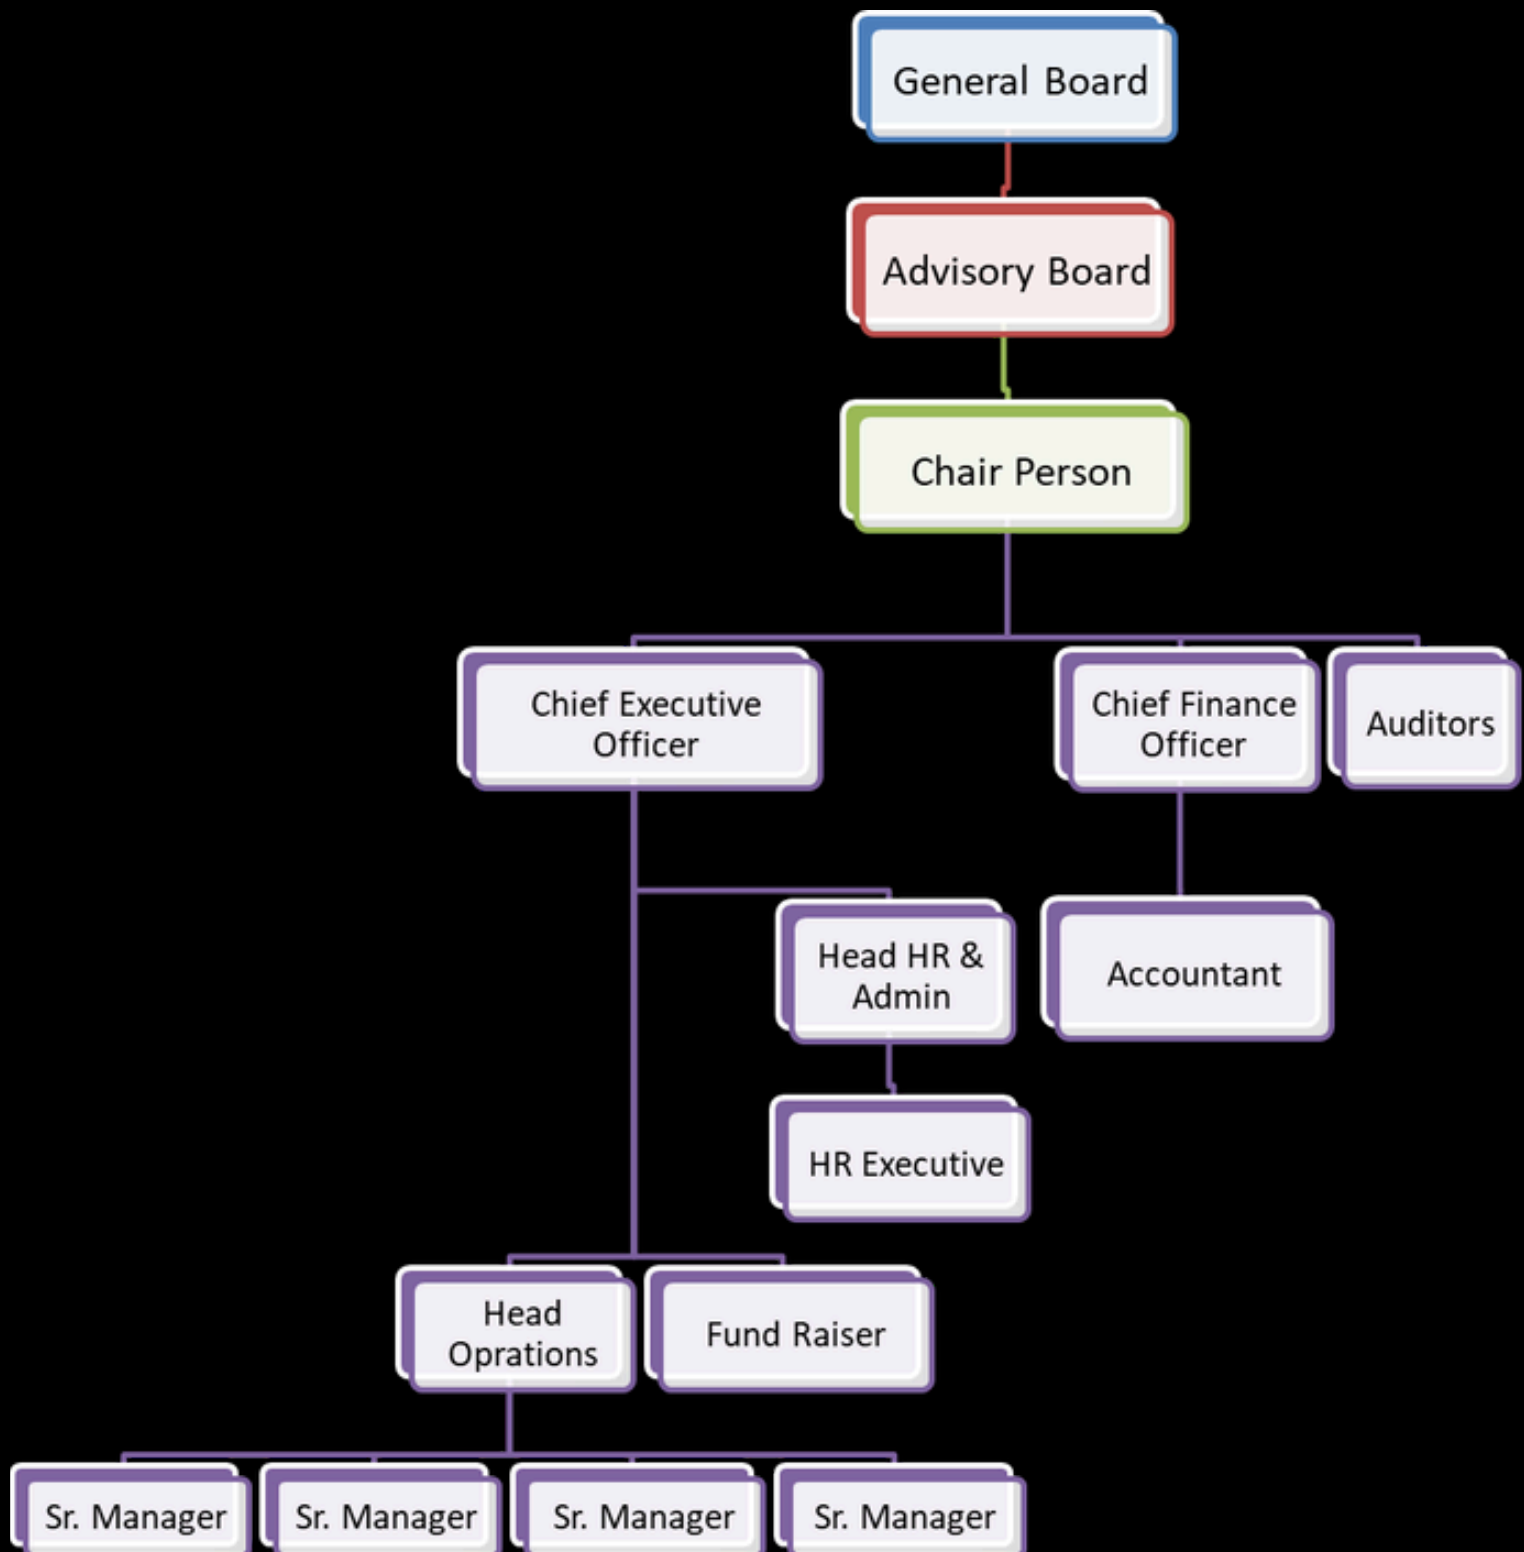

Water Conservation Project

Charvi Empowerment Society's Watershed Program is a vital project designed to address the growing issue of water scarcity in rural Bangalore. This initiative focuses on the conservation of rainwater and the recharge of groundwater resources, ensuring a steady supply of water for both agricultural and domestic needs. The program involves the construction of a watershed that captures and stores rainwater, improving the overall water availability throughout the year, even during dry spells. By providing farmers with a sustainable water source, the project enhances agricultural productivity, reduces dependency on erratic rainfall, and prevents soil erosion. In addition to its environmental benefits, the Watershed Program fosters community participation by engaging local residents in water conservation practices and creating awareness about sustainable water management. The program has also facilitated better irrigation practices, improving crop yields and helping farmers adapt to changing climate conditions. Through the Watershed Program, Charvi Empowerment Society is working to strengthen the resilience of rural communities against the impacts of climate change while ensuring long-term water security. This initiative is crucial for the sustainable development of the area, improving livelihoods and contributing to the overall well-being of the community.
